Course Goals

At the end of this course, you will be able to

- Understand the principles of solid modeling.
- Manage and view Designer Modeling components quickly and effectively.
- Make design decisions that use an optimized design process to produce the required model functionality.
- Create, modify, and manipulate analytic models to meet day-to-day engineering requirements.
- Use a model as the master control for design revisions.
- Customize the Designer Modeling user interface.

Table of Contents

Legal Notices	ii
Course Goals	iii
MODULE 1: 3D MODELING WITH ONESPACE DESIGNER MODELING	1-1
The modeling process	1-2
The Designer Modeling user interface	1-3
Change the UI appearance	1-4
Work with the task panel	1-5
Work with dialogs	1-6
Enter data	1-7
Enter text	1-8
Work with the mouse	1-9
View options	1-10
Preselect an item	1-11
Fly-by highlighting and preselection of parts	1-12
Work in 3D space	1-13
UI tools — the CoPilots	1-14
The UI settings menu	1-15
The system settings menu	1-16
Using help	1-17
Online help	1-18
Context-sensitive help	1-19
CoCreate on the Web	1-20
CoCreate website and eSupportMarketplace	1-21
Module 1: 3D modeling review	1-22

MODULE 2: WORKPLANES	2-1
What is a workplane?	2-2
Create a workplane	2-3
Create a workplane with a 3D model	2-4
Copy a workplane	2-5
Copy a partial workplane	2-6
Share a workplane	2-7
Modify a workplane	2-8
Module 2: Workplane review	2-9
MODULE 3: CREATING 2D PROFILES	3-1
The modeling process	3-2
Types of 2D geometry	3-3
2D geometry menus	3-4
Construction geometry	3-5
Catch	3-6
Complete your construction lines	3-8
The 2D CoPilot	3-9
Profile geometry	3-10
Modify and convert construction geometry	3-11
The contour menu	3-12
Add tangent	3-13
Draw a profile	3-14
Draw a profile: step-by-step	3-15
Module 3: Creating 2D profiles review	3-17
MODULE 4: MACHINING PARTS	4-1

OneSpace Designer Modeling Beginner Training

Table of Contents

Machining profiles to create a solid model	4-2
Add material	4-3
Standard 3D CoPilot	4-4
Remove material	4-5
Use 2D CoPilot to modify a model	4-6
Punch your model	4-7
Machine settings	4-8
Build the muffler	4-9
Build the muffler: step-by-step	4-10
Add fins to the muffler	4-12
Add the mounting flange	4-14
Add the mounting flange: step-by-step	4-15
Module 4: Machining parts review	4-17
MODULE 5: FILE HANDLING	5-1
Saving and loading files	5-2
Save a file with Model Manager	5-3
Load a file from Model Manager	5-4
The Model Manager load window	5-5
Save a 3D file in Designer Modeling: Package and 3D Data files	5-6
Save a package file	5-7
Project directories	5-8
3D Data files	5-9
3D Data file types: instance and contents	5-10
3D Data file suffixes	5-11
Shared, unshared, and copied objects	5-12

OneSpace Designer Modeling Beginner Training

Table of Contents

Save 3D Data and 3D Modified files	5-13
Load 3D Data files	5-14
2D data files	5-15
Module 5: File handling review	5-16
MODULE 6: FEATURES	6-1
System-recognized features	6-2
The Select menu	6-4
Rib features and slot features	6-5
Identify types of features	6-6
User-defined features	6-7
Create a user-defined feature	6-8
Part group features	6-9
Defined features in the Structure Browser	6-10
Cut faces and features	6-11
Copy faces and recognized features	6-12
Paste faces and recognized features	6-13
Two additional features: custom process and machining	6-14
Module 6: Features review	6-15
MODULE 7: MODIFYING PARTS – PART 1	7-1
Modify 3D	7-2
Dynamic interaction with the 3D CoPilot	7-3
Select 3D elements	7-4
Blend edges	7-5
Blend edges — the rolling ball	7-6
Variable blends	7-7

OneSpace Designer Modeling Beginner Training

Table of Contents

Blend: Create versus insert, multiple edges	7-9
Create a blend and insert a blend	7-10
Modify, recognize, and remove blends	7-11
Chamfer edges	7-12
Tips for blend — rollover	7-13
Tips for blend — global topology change	7-14
Tips for blend — radius size	7-15
Create blends for convex and concave edge intersections	7-16
Create blends for convex and concave edge intersections: step-by-step	7-17
Module 7: Modifying parts review	7-18
MODULE 8: MODIFYING PARTS – PART 2	8-1
Modify parts	8-2
Taper faces	8-3
Taper a face part	8-5
Copy and paste a face part	8-6
Advanced taper	8-7
Limitations on taper	8-8
Preserve tangency conditions	8-9
Move faces and features	8-10
Lift faces	8-11
Move versus Lift	8-12
Offset faces and features	8-13
Align faces	8-14
Change the radius of a radial face	8-15
Mirror parts	8-16

OneSpace Designer Modeling Beginner Training

Table of Contents

Module 8: Modifying parts review	8-17
MODULE 9: PARTS & ASSEMBLIES	9-1
Parts and assemblies	9-2
View parts and assemblies	9-3
View and change part properties	9-4
Copy parts and assemblies	9-5
Share parts and assemblies	9-6
Selective instances	9-7
Create a new configuration	9-8
Measure parts	9-9
Part and assembly analysis: Clash check	9-10
Clash analysis	9-11
Part and assembly analysis: Clearance analysis	9-13
Part and assembly analysis: Check parts	9-14
Part and assembly analysis: Draft analysis	9-15
Share and align the backplate and crankcase	9-16
Module 9: Parts & assemblies review	9-20
MODULE 10: VIEWING PARTS	10-1
Rotate a model	10-2
The Viewport and its functions	10-3
Use the Viewport menu	10-4
Use the Show menu	10-5
The Structure Browser	10-6
Search and Filter in the Structure Browser	10-7
Use the Drawlist	10-8

OneSpace Designer Modeling Beginner Training

Table of Contents

Options in the Structure Browser	10-10
Keyboard and mouse actions in the Structure Browser	10-11
Create a realistic view	10-12
Facets	10-13
Assign material properties	10-14
Clipping planes	10-17
Perspective viewing	10-18
Generate a hard copy	10-19
Module 10: Viewing parts review	10-20
MODULE 11: CUSTOMIZE THE USER INTERFACE	11-1
Customize the user interface	11-2
Command button properties	11-3
Commands tab – context menus	11-4
Create and modify commands	11-5
Create new menus	11-6
Record a macro	11-7
Modify and create toolbars	11-10
Toolbars	11-11
Customize preselection menus	11-12
Define keyboard shortcuts	11-13
Specify abbreviations	11-14
Other customizing options	11-15
Module 11: Customize the user interface review	11-16
OVERVIEW: ADDITIONAL DESIGNER FUNCTIONALITY	1
Model Manager	2

OneSpace Designer Modeling Beginner Training

Table of Contents

Advanced Design module	3
Surfacing module	4
Sheet metal module	5
Finite Element Analysis module	6
Mold Base module	7
3D Library module	8
Data Adapters	9
