

### Application Scope

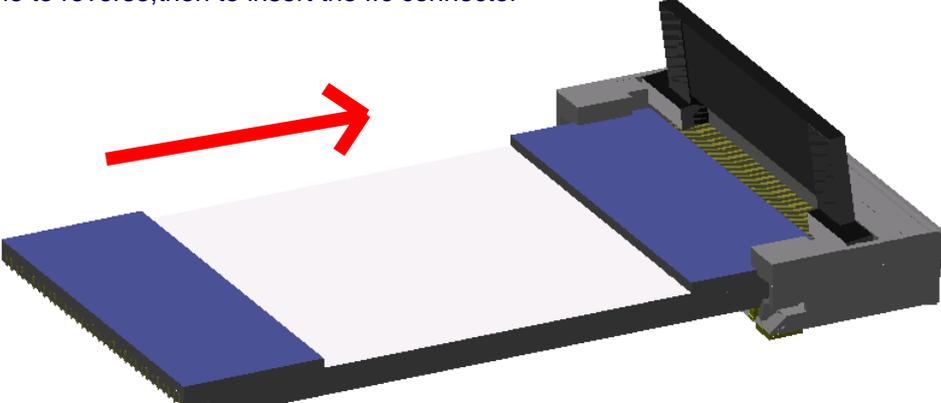

1. This LVDs ffc cable only used to connect the molex's LVDs ffc connector 502231 & 502244 series.
2. Support 100 Ohm impedance designs for up to 1.25 Gbps.
3. Special grounding techniques to provide superior noise suppression and signal line impedance control for high frequency, low power LVDs applications such as flat panel display TVs and gaming consoles.
